BIOMETRIKA

FOUNDED BY

W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

MANAGING EDITOR

E. S. PEARSON

ASSOCIATE EDITORS

M. G. KENDALL JOHN WISHART

in consultation with

HARALD CRAMÉR R. C. GEARY

J. B. S. HALDANE

VOLUME 39

1952

ISSUED BY

THE BIOMETRIKA OFFICE, UNIVERSITY COLLEGE, LONDON

PRINTED AT THE UNIVERSITY PRESS, CAMBRIDGE

PRINTED IN GREAT BRITAIN

CONTENTS OF VOLUME 39

Memoirs

		PAGES
I.	Moment coefficients of the k-statistics in samples from a finite population. By JOHN WISHART	1—13
II.	Moment-statistics in samples from a finite population. By M. G. KENDALL	14—16
III.	Some exact tests in multivariate analysis. By E. J. WILLIAMS	17—31
IV.	The construction of balanced designs for experiments involving sequences of treatments. By H. D. PATTERSON	32—48
V.	Multi-factor designs of first order. By G. E. P. BOX. With two Figures in the Text	49—57
VI.	Tests of significance in canonical analysis. By F. H. C. MARRIOTT	58—64
VII.	The interpretation of interactions in factorial experiments. By E. J. WILLIAMS	65—81
VIII.	On sampling from a population of rankers. By A. S. C. EHRENBERG	82—87
IX.	Least squares estimation of location and scale parameters using order statistics. By E. H. LLOYD	88—95
X.	Regression, structure and functional relationships. Part II. By M. G. KENDALL	96—108
XI.	On the concurrence of a set of regression lines. By K. D. TOCHER	109—117
XII.	A sampling test of the χ^2 theory for probability chains. By M. S. BARTLETT	118—121
XIII.	On mathematical analysis of style. By WILHELM FUCKS. With one Figure in the Text	122—129
XIV.	Comparison of two approximations to the distribution of the range in small samples from normal populations. By E. S. PEARSON. With one Figure in the Text	130—136
XV.	The covering circle of a sample from a circular normal distribution. By H. E. DANIELS. With one Figure in the Text	137—143
XVI.	The frequency justification of certain sequential tests. By G. A. BARNARD	144—150
XVII.	Experimental designs for serially correlated observations. By R. M. WILLIAMS. With one Figure in the Text	151—167
XVIII.	The time intervals between industrial accidents. By B. A. MAGUIRE, E. S. PEARSON and A. H. A. WYNN. With two Figures in the Text	168—180

UNIVERSITY OF UTAH LIBRARIES

PAGES

XIX. The estimation of death-rates from capture-mark-recapture sampling. By P. A. P. Moran . . . . . 181—188

XX. Estimation by double sampling. By D. R. Cox. With one Figure in the Text . . . . . 217—227

XXI. The statistical significance of odd bits of information. By M. S. Bartlett . . . . . 228—237

XXII. Sampling from bivariate non-normal universes by means of compound normal distributions. By Hannes Hyrenius . . 238—246

XXIII. The estimation of the Poisson parameter from a truncated distribution. By P. G. Moore. With one Figure in the Text . . 247—251

XXIV. The fitting of grouped truncated and grouped censored normal distributions. By P. M. Grundy . . . . . 252—259

XXV. Estimation of the mean and standard deviation of a normal population from a censored sample. By A. K. Gupta. With one Figure in the Text . . . . . 260—273

XXVI. Use of scores for the analysis of association in contingency tables. By E. J. Williams . . . . . 274—289

XXVII. Properties of distributions resulting from certain simple transformations of the normal distribution. By J. Draper. With two Figures in the Text . . . . . 290—301

XXVIII. On a two-sided sequential t-test. By S. Rushton . . . 302—308

XXIX. Tests of fit in time series. By P. Whittle . . . . . 309—318

XXX. Tensor notation and the sampling cumulants of k-statistics. By E. L. Kaplan . . . . . 319—323

XXXI. Rank analysis of incomplete block designs. I. The method of paired comparisons. By Ralph Allan Bradley and Milton E. Terry . . . . . 324—345

XXXII. Studies in statistical ecology. I. Spatial pattern. By J. G. Skellam. With one Figure in the Text . . . . . 346—362

XXXIII. The estimation of population parameters from data obtained by means of the capture-recapture method. II. The estimation of total numbers. By P. H. Leslie . . . . . 363—388

XXXIV. The growth, survival, wandering and variation of the long-tailed field mouse, *Apodemus sylvaticus*. III. Wandering power and distribution. By H. P. Hacker and H. S. Pearson. With thirteen Charts and one Map . . . . . 389—413

UNIVERSITY OF UTAH LIBRARIES

PAGES

Miscellanea

(i) A note on the design problem. By K. D. TOCHER . . . 189

(ii) Tables of percentage points of the 'Studentized' extreme deviate from the sample mean. By K. R. NAIR . . . . . 189—191

(iii) Extended and corrected tables of the upper percentage points of the 'Studentized' range. Computed by JOYCE M. MAY . . 192—193

(iv) On the distribution of 'Studentized' range. By K. C. S. PILLAI . 194—195

(v) Note on a certain family of discrete distributions. By J. S. MARITZ . . . . . 196—198

(vi) Some properties of runs in smoothed random series. By ALISON M. GRANT. With one Figure in the Text . . . . . 198—204

(vii) An approximation to the symmetrical incomplete beta function. By J. H. CADWELL . . . . . 204—207

(viii) The distribution of quantiles of small samples. By J. H. CADWELL 207—211

(ix) On a correction term in the method of paired comparisons. By J. A. VAN DER HEIDEN . . . . . 211—212

(x) Review of L. HOGBEN's *Chance and Choice by Cardpack and Chessboard*. By F. N. DAVID 213

(xi) Review of PETER WHITTLE's *Hypothesis-testing in Time Series Analysis*. By F. N. DAVID . . . . . 213—214

(xii) Review of A. N. KOLMOGOROV's *Foundations of the Theory of Probability* and of A. KHINTCHINE's *Asymptotische Gesetze der Wahrscheinlichkeitsrechnung*. By F. N. DAVID 214

(xiii) Review of *Statistical Methodology Reviews 1941–1950*. Edited by OSCAR KRISKEN BUROS. By A. STUART 215

(xiv) Editorial Note on a paper by J. GIL-PELAEZ 215

(xv) Samples with the same number in each stratum. By W. L. STEVENS . . . . . 414—417

(xvi) Approximations to the probability integral of the distribution of range. By N. L. JOHNSON . . . . . 417—419

(xvii) Statistical control of counting experiments. By H. O. LANCASTER 419—422

(xviii) Upper 5 and 1% points of the maximum F-ratio. By H. A. DAVID 422—424

(xix) The conditions under which Gram-Charlier and Edgeworth curves are positive definite and unimodal. By D. E. BARTON and K. E. DENNIS. With one Figure in the Text . . . . . 425—427

PAGES

(xx) Comparison of analysis of variance power function in the parametric and random models. By N. L. JOHNSON . . . 427—429

(xxi) On exact grouping corrections to moments and cumulants. By MORTON KUPPERMAN . . . . . 429—434

(xxii) Discrimination in time-series analysis. By A. RUDRA . . . 434—439

(xxiii) A note on 'The estimation of the parameters of tolerance distributions'. By D. J. FINNEY 439

(xxiv) Review of *Proceedings of the Second Berkeley Symposium on Mathematical Statistics and Probability*. Edited by J. NEYMAN. By F. N. DAVID 440

(xxv) Review of *Applied Statistics. A Journal of the Royal Statistical Society*, Vol. I. Edited by L. H. C. TIPPETT. By E. S. PEARSON 440—441

(xxvi) Review of WILFRED J. DIXON and FRANK J. MASSEY's *Introduction to Statistical Analysis*. By JOHN WISHART . . . . 441—442
